

AUTOMATE TO INNOVATE

Sovelio® Vault automation tool for Autodesk Vault can streamline your Vault use, help automate routines and provide a complete overview of your work processes.

HIGH LEVEL OF STANDARDISATION

With Sovelia® Vault you can achieve a higher level of standardisation within and between projects.

REDUCE MANUAL AND LABOUROUS WORK

Sovelio® Vault provides high level process automation tools that eliminate manual and labor-intensive work for engineers by registering design data, converting the data into general file formats (like .PDF) and sharing and releasing these files.

SOVELIA VAULT TIMESAVERS

- Sovelia® Vault is a tool for easy configuration. No programming required.
- Achieve a higher level of standardization and uniform file data in Vault.
- Four eyes check and automated revision tables to document your workflows.
- Eliminate manual and labor-intensive work for engineers.

Core functionality examples	Challenge when doing this manually	Benefit with Sovelia Vault
Secondary file formats	File storage and appearance not controlled. IP not protected.	Achieve Uniformity and protect IP.
Drawing list	Time consuming and manual labor-intensive process.	Achieve a full overview of all drawings in the model.
Data export	No automated communication between different systems (erp, crm, dcc.....).	Enables Vault to communicate with other systems.
Property updates	No controlled user records in revision history.	Four eyes check and easy ISO process documentation.
Job queue management	Error jobs on jobserver are not controlled.	Automatically sends errors information and cleans up.
